AFFIDAVIT of  
Special Agent Brian Snedeker  
Drug Enforcement Administration  
Bristol, Virginia

1. I, Special Agent Brian Snedeker, being duly sworn hereby depose and say:
2. The purpose of this application and affidavit is to secure a search warrant for the premises known as the cabin in the woods behind 23634 Sawmill Road, Damascus, VA. This affiant, after obtaining and reviewing information, believes there is evidence of conspiracy to manufacture methamphetamine and/or manufacturing methamphetamine at the cabin in the woods behind 23634 Sawmill Road, Damascus, VA in violation of 21 USC 846/841(a)(1) and 841(a)(1).
3. I am a Special Agent with the Drug Enforcement Administration (DEA) and have been so employed for approximately (23) years. During my employment I have received comprehensive classroom training from the Drug Enforcement Administration in specialized narcotic investigative matters including but not limited to drug interdiction, drug detection, money laundering techniques and schemes, smuggling, and the investigation of individuals and organizations involving the smuggling, cultivation, manufacturing, and illicit trafficking of controlled substances and controlled substance precursors. I am a graduate of both the DEA's Clandestine Laboratory Investigation/Safety Certification Program and the DEA's Clandestine Laboratory Site Safety Officer School. I have participated in the execution of more than (300) narcotics related search warrants and the seizure and dismantling of more than (200) clandestine methamphetamine laboratories. I have testified as an expert on multiple occasions in Federal Court and State Court regarding the clandestine manufacturing of methamphetamine.
4. The facts set forth in this affidavit are known to me as a result of my personal participation in the investigation of Larry Greer and information provided to this affiant by other law enforcement officers and an individual on federal probation.
5. The manufacturing of methamphetamine (a Schedule II Controlled Substance) by way of the ammonium nitrate/lithium metal method (also known as the "shake and bake" or "one pot" method) requires pseudoephedrine/ephedrine (obtained through the processing of cold/allergy pills, tablets, gelcaps, and liquids containing pseudoephedrine or ephedrine), ammonium nitrate (found in instant cold packs), and lithium metal (found in lithium batteries). Other chemicals/ingredients commonly used during the ammonium nitrate/lithium metal method include sodium hydroxide (e.g. Red Devil Lye), petroleum ether/petroleum naphtha/white gas (e.g. Coleman Fuel, lighter fluid), acetone, muriatic acid, sulfuric acid, table salt, and aluminum foil. Equipment/tools commonly used during the manufacturing of methamphetamine include soda bottles, glass mason jars, plastic food storage containers, plastic tubing, electrical tape and/or duct tape, coffee filters, pipe cutters

(often used to open lithium batteries), Ziplock-type plastic bags, frying pans/electric skillets/propane burners (to dry the methamphetamine), razor blades, digital scales, funnels, and stirring utensils.

6. Individuals who manufacture methamphetamine usually use and sell/trade the methamphetamine they manufacture. These manufacturers routinely have other persons (hereafter referred to as "shoppers") assist them in the purchasing of precursors, chemicals, and equipment/supplies needed to manufacture methamphetamine. Manufacturers will regularly pay shoppers in methamphetamine (to use and sell) and/or cash for their assistance.
7. During the last (6) months, an individual on federal probation (hereafter referred to as Person A) advised this affiant that he had purchased pseudoephedrine and delivered it to Larry Greer at Greer's cabin in the woods in Damascus, VA during 2014. Person A claimed that Greer was manufacturing methamphetamine via the "one pot" (ammonium nitrate/lithium metal) method. Person A advised that Greer provides ( $\frac{1}{2}$ ) gram of methamphetamine for a box of pseudoephedrine tablets. The directions to/description of Greer's cabin provided by Person A to this affiant accurately described the directions to/description of Greer's cabin as it is known to law enforcement. Person A provided the aforementioned information against his/her own penal interest.
8. Larry Greer and his brother, Ogene Kenneth Greer, have the same street address listed on their drivers licenses.
9. This affiant has reviewed pseudoephedrine sales data provided by a number of retailers (as required under The Combat Methamphetamine Epidemic Act of 2005) and noted the following information:
  - On 09-06-2012, Larry Greer purchased a (10) day supply of pseudoephedrine.

10. Pseudoephedrine and ammonium nitrate (instant cold packs) are key ingredients to the manufacturing of methamphetamine via the ammonium nitrate/lithium metal method. During the last several years, this affiant has routinely found and seized (via search warrants and consent searches) the aforementioned ingredients (and packaging of same) at methamphetamine manufacturing/precursor preparation sites. This affiant has encountered and seized said ingredients at such sites in various forms/stages (e.g. sludges/mixed with liquids) related to methamphetamine production and contained in a variety of glass and plastic containers days, weeks, and even months after the ingredients were purchased at pharmacies/retail stores.

11. This affiant is aware based on his training, experience, and conversations with other law enforcement officers that individuals who illegally manufacture methamphetamine and/or conspire to do so typically maintain methamphetamine manufacturing precursors/chemicals/equipment (as described in paragraph #5 above) along with receipts / notes / records / telephone numbers (as they pertain to manufacturing/conspiracy to manufacture), and other items as listed and explained on Attachment B (of the Application and Affidavit for Search Warrant to which this affidavit is attached) on their persons, inside their residences, garages, outbuildings/barns, campers, vehicles (or the vehicles they operate), and inside of vehicles registered to other persons when those vehicles are parked at the manufacturer's/conspirator's residence/property.

12. Individuals who manufacture methamphetamine and/or conspire to do so routinely have persons who are methamphetamine users and/or additional co-conspirators (i.e. shoppers) present at their residences/properties. These users/co-conspirators often illegally possess methamphetamine and methamphetamine use

paraphernalia and routinely possess notes, stored telephone numbers, and messages pertaining to their relationships with methamphetamine manufacturers / manufacturing co-conspirators. These users/co-conspirators are oftentimes in possession of other items as listed and explained on Attachment B (of the Application and Affidavit for Search Warrant to which this affidavit is attached) and possess these items on their persons and in their vehicles (or the vehicles they operate) which are oftentimes parked at the drug manufacturer's/co-conspirator's residences/properties.

13. The clandestine manufacturing of methamphetamine is an extremely dangerous process that involves the use of toxic, flammable, explosive, and incompatible chemicals. Explosions, fires, and toxic gasses generally pose the greatest threats to law enforcement officers executing search warrants at methamphetamine manufacturing sites. It is not uncommon for methamphetamine manufacturers to panic when they become aware of a law enforcement presence at a methamphetamine manufacturing site. As a result of their panic, methamphetamine manufacturers have been known to attempt to dispose of evidence of their manufacturing by throwing/pouring chemicals into toilets, bathtubs, and sinks before law enforcement can gain entry and secure the premises. The pouring/mixing of the various chemicals during the attempted disposal creates an increased risk of explosion, fire, and toxic gas exposure due to the nature of the chemicals involved. This affiant believes that the above presents reasonable suspicion that knocking and announcing the presence of law enforcement officers at the time of the execution of this search warrant would prove dangerous to the law enforcement officers involved in the execution of the search warrant.
14. Larry Greer's known daytime residence is the cabin in the woods behind 23634 Sawmill Road, Damascus, VA. It is known to law enforcement that there is no electrical service to the cabin and Larry Greer spends his nights at a relative's residence.
15. Based upon the facts set forth above, I believe that there is probable cause for the issuance of a search warrant for the premises known as the cabin in the woods behind 23634 Sawmill Road, Damascus, VA (located within the Western District of Virginia) as there is probable cause to believe that there is evidence of a violation of 21 USC 846/841(a)(1) and/or 841(a)(1) at said premises.
